## Introduction

*Reference code:* GB-0033-DCD/E

*Collection title:* Durham Cathedral Archive: plans, surveys and valuations

*Dates of creation:* 1740-1868

*Extent:* XXX

Durham University Library, Archives and Special Collections

*Creator:* Dean and Chapter of Durham Cathedral, and officers working under the Receiver (specifically the Sub-Receiver or land agent, and local bailiffs)

*Language of material:* Records are written in English.

## Contents

Surveys and valuations of the dean and chapter's estates, many with associated plans.

Also other plans of dean and chapter properties.

For the use of some of these records for tracing the history of a property formerly belonging to Durham Cathedral, see also separate guide online.

## Accession details

Parts in the custody of Durham University since [1950s], with some items transferred by the Chapter Clerk more recently, as noted within list. Most of the leasehold surveys (DCD/E/A) were taken over by the Ecclesiastical Commissioners ca.1870, and deposited with the University by their successors (Church Commissioners) in 1956: Church Commissioners' references for these items are noted within the list ('CCD' numbers).

## Conditions of access

Records older than 30 years are open for consultation. More recent records may require prior written permission from the Chapter Clerk.

## Copyright and copying

Permission to make any published use of material from the collection must be sought in advance from the Reprographics Officer at Durham Cathedral Library ([library@durhamcathedral.co.uk](mailto:library@durhamcathedral.co.uk)) for items owned by the Cathedral, and from the Church of England Record Centre ([archives@churchofengland.org](mailto:archives@churchofengland.org)) for the Church Commission material (with 'CCD' references in the catalogue): contact Palace Green Library ([pg.library@durham.ac.uk](mailto:pg.library@durham.ac.uk)) if in doubt about ownership of any items. The Library will assist where possible with identifying copyright owners, but responsibility for ensuring copyright clearance rests with the user of the material.

## Form of citation

The form of citation should use the code GB-0033-DCD, or the collection name Durham Cathedral Archive, followed by the *reference number*

To order items in the searchroom, use the collection reference code(s), derived by removing the repository code (GB-0033-), followed by the reference number. Citing the section of the finding aid is useful.

## Surveys of the leasehold estate

DCD/E/A 1740-1868

Plans, surveys, valuations and terriers of the dean and chapter's leasehold properties. In general, these consist of an 18th century survey and plan, with updated valuations (typically every 7 years). However, only some of the 18th century plans exist, and there are many gaps in the survey material. The series listed here are arranged in a conventional order used for most of the cathedral's estate records before the 19th century: this is a geographical arrangement, starting with Durham and going north to Gateshead and Heworth, then east to South Shields and roughly clockwise around County Durham, ending at Shincliffe and Croxdale just south of Durham (see outline plan of Co Durham showing the route/arrangement within guide to tracing properties online).

*Biographical information:* Most of Durham cathedral's property was leasehold (especially after 1577, when remaining copyhold tenure on the cathedral estates was converted to leasehold), and was held by a system of renewable leases that is typical of ecclesiastical property before about 1870, but unfamiliar today. A property or tenement would be leased usually for a period of 21 years (40 years for some town properties). However, the leaseholder would not wait until the end of the term before renewing the lease, but would renew after (typically) just seven years (or 14 for town properties). The annual rent for the property was fixed or fossilised, at least after 1660 (if the property remained undivided), and is known as the *reserved rent*, with the leaseholder paying an additional lump sum (called a "fine") on renewal of the lease to reflect the real value of the property. Valuations were therefore usually carried out when leases came up for renewal, to help set the level of the renewal 'fine'.

*Ownership history:* Most of the plans and books of survey within this section are part of the Church Commissioners' Deposit of Cathedral Estates material (CCD).

Earlier surveys and plans

DCD/E/AA 1740-1812

Estate plans of dean and chapter leasehold property, most with books of survey (incomplete series). In most cases, plots on the plans are numbered, referring to entries within the books of survey. The latter show leaseholders, reserved rents and acreages. The leaseholder's name and reserved rent can be used to match a property on these plans to an entry within the Notitia books (DCD/F/CB), and thereby to the earlier estate records. See also later series of plans at DCD/E/AF.

## DCD/E/AA/1 1768

Plan of Sir Benjamin Rawling's estate, leased from the dean and chapter, at Hebburn, Haining and Heworth Shore (Bill Quay), in Jarrow and Heworth parishes. Surveyor Richard Richardson. With decorated cartouche, dividers, scale and compass point, and table of plots showing tenants, acreages and quality as M[eadow], P[asture], W[ood] or A[rable]. Also small sketch of Durham Cathedral south side near cartouche, sailing ships shown in river Tyne, windmill, quarries and footpaths marked, and layout of garden etc at Hebburn Hall. Includes notes on buildings at Heworth and Haining Shore, estates noted as tithe free

No contemporary book of survey survives. Plot numbers from this map are used in the 1790s "Gateshead and Heworth" survey book DCD/E/AB/5. This plan only covers a small area of Heworth. Another 18th century plan of the rest of Heworth seems to have been drawn up, as the later survey books (DCD/E/AB/5 etc) refer to plots that are not included within this plan. However, no other 18th century estate plan of Heworth including numbered plots now survives.

## Later plans and surveys

DCD/E/AF 1827-1852

All the following surveys or terriers include numbers referring to plans, although a few of the plans do not survive among the cathedral archives.

These surveys post-date the valuation information in the earlier series of valuations (DCDE/AB-AD), but may be used in later valuations of the properties (series DCD/E/AG). Only a few townships were surveyed after 1827: for most places the earlier surveys continued to be used in later valuations, at least until the tithe apportionment surveys of the 1840s.

Surveys of Durham City and South Shields properties for enfranchisement

DCD/E/BC 1799

Each property surveyed includes a sketch-plan of the property, with notes in columns showing the location, proprietor (i.e. the Chapter's lessee), occupier (i.e. the lessee's sub-tenant), date on which the lease in force in 1799 had been granted, reserved (fixed) rent and clear annual value. Entries for Durham City properties include remarks on the rateable value at the last renewal and according to the parish rate-books, with a note of out-rent. See also the main series of 18/19th century valuations relating to the leasehold estate within section DCD/E/A.

*Biographical information:* The surveys were compiled to enable the enfranchisement and redemption of Land Tax on the Dean and Chapter's estates, under the Land Tax Perpetuation Act 1798 (which provided for redemption): to fund the redemption, the Dean and Chapter planned to sell their urban properties within Durham City and South Shields market place, for which Matthew Woodfield, one of the Chapter's bailiffs, was instructed to survey and value the properties. The plans for enfranchisement were unsuccessful in 1799: for Durham City properties, see series DCD/E/BD for a more successful campaign of enfranchisement and redemption in 1805-1807, as well as a 'fair copy' of the survey and sketch plans.
