Introduction

Collection title: Durham Cathedral Archive: Medieval Accounting Material: Cells

Reference code: GB-0033-DCD (subdivision given under each category)

Dates of creation: 13th - 16th century

Extent: given under each category

Repository: Durham University Library, Archives and Special Collections

Creator: accounting records made by officials responsible to the monastery at Durham.

Language of material: Latin

The large group of medieval accounts was listed in a single catalogue, but as more detail is added it has expanded and has been divided into three sections (December 2017) as follows:

Obedientiaries (office holders)

Subsidiary estates and manors

Cells of Durham Priory (this catalogue)

Contents

With one significant exception the three lists of medieval accounts aim to cover all the medieval accounting material found in the Durham Cathedral Archive, together with items from the series of accounts that has been found elsewhere. The exception is material relating to the collection of taxation, briefly listed near the top of the list of Manorial etc accounts: for this to be dealt with properly will require examination of the corresponding material in The National Archives.

In the lists that follow all items simply defined by date are accounts. For all other accounting material a brief indication of its nature is given, in terms that match those used in the reference to the document, e.g. Bursar, Sale of Tithes. Here, however, the dates covered by each item are given as fully as possible, and where these are not taken directly from the heading, either because it is lost or damaged, or because it does not give full details, this is shown by square brackets, [].

Accession details

Deposited by the Dean and Chapter of Durham in 1947.

Arrangement

The accounts are listed by accountant, in chronological order. They are identified by their date: a date alone shows that it is the standard document for the section (usually this means it is an account, but in a section such as Bursar-Granator Indentures it will be an indenture. Where accounts contain other information this is given in the description. If the document is not of the standard form, the date is qualified in some form, such as Status, 1328, which serves to differentiate it from the main sequence. Where more than one version of a document occurs it is marked within the description by a series of letters (A), (B) etc. On a few occasions there are two different documents of the same type in the same year, which have separate entries, such as Status, 1328 (A) and Status, 1328 (B) - where these have separate entries they are different documents, where included under the same heading they are duplicates.

The rounded heads of the rolls may have been carried out as late as the nineteenth century, as on Hostiller 1353-4 where modern writing on the dorse has been partly cut away.

Copyright and copying

Permission to make any published use of material from the collection must be sought in advance from Durham Cathedral Library (library@durhamcathedral.co.uk). The Library will assist where possible with identifying copyright owners, but responsibility for ensuring copyright clearance rests with the user of the material.

Form of citation

The short form of citation requires the overall collection code (GB-0033-DCD) with the class code (e.g. Ter. acs) joined to it by a hyphen

Individual items are referred to by their date, unqualified in the case of a standard account, or else including the type of document; thus "1498-9" or "Status, 1415". If required, multiple copies can be distinguished by the letters used "1498 (A)".

A full citation of an item within the collection takes the form:

Durham Cathedral Archive: medieval accounts: *class namedate*

For example:

Durham Cathedral Archive: medieval accounts: Finchale 1363-4

GB-0033-DCD-Finc. acs 1363-4

To order items in the searchroom, use the collection reference code(s), derived by removing the repository code (GB-0033-), followed by the reference number. Citing the section of the finding aid is useful.
