## Introduction

*Collection title:* Gibby Negatives

*Reference code:* GB-0033-GIN

*Dates of creation:* ca. 1860- ca. 1960

*Extent:* 1,084 items

*Repository:* Durham University Library, Archives and Special Collections

*Creator:* Dr. C.W. Gibby (1902-1989)

## Contents

Negatives, some glass, some celluloid, mainly related to Durham city, taken or in some cases collected by Dr C.W. Gibby. The collection covers buildings, street scenes, views, people, paintings, engravings, manuscripts, maps, coins and other objects associated with Durham city, and reflects Dr. Gibby's interest in its history and determination to record its changing appearance. There are also a small number of negatives of other places in Co. Durham, and a large group related to railways.

The majority of the negatives are glass, the most common sizes being 3 x 4 and 3 x 3 inches.

## Dr C.W. Gibby

Dr. Clifton William ('Jack') Gibby FSA lectured in chemistry at the University of Durham 1926-1967, but was best known for his wide knowledge of local history and other matters of antiquarian interest, on which he lectured widely.

## Accession details

Presented by Dr Gibby in the 1970s.

## Arrangement

The collection is arranged by an alpha-mnemonic scheme of Dr. Gibby's devising, not altogether consistently executed (in which, for example, negatives of the Assize Courts, Abbey House on Palace Green, and Allergate may be found in class A, but other buildings on Palace Green in class P. Negatives concerning Durham castle are in class Ca, those on Durham cathedral in class Ch, portraits of individuals and groups in class Pi, and railways, oddly, in class Th).

A complete visual index of 5" x 3" prints of the negatives, arranged in the same order as the collection, is available for users of the collection in the Palace Green Library's Special Reading Room. This is largely the work of Dr. Gibby and Mr. D.V. Kelly.

## Form of citation

The form of citation should be GB-0033-GIN, or the collection title, Gibby Negatives *reference number*.

To order items in the searchroom, use the collection reference code(s), derived by removing the repository code (GB-0033-), followed by the reference number. Citing the section of the finding aid is useful.

## Related material (internal)

The collection overlaps with two others given to the University Library by Dr. Gibby: the Gibby Photographic Prints Collection, and the Gibby Lantern Slides Collection. See also the Gibby Papers.
