## Contents

The class Miscellaneous Charters was created in the mid-nineteenth century by Joseph Stevenson, in the process of cataloguing substantial portions of Durham Cathedral's medieval muniments. How exactly he proceeded is not clear, but his work did not cover major sections of medieval material, notably the documents catalogued in the late fifteenth-century *Magnum Repertorium*, and also almost all the accounting material. He catalogued the documents classed in the sequence of numbered Locelli, a medieval creation whose basic principle of arrangement according to subject he retained, but without preserving its details. The documents initially assigned to Miscellaneous Charters had clear topographical associations, for the arrangement evidently began with an alphabetical order of places in view, and it is uncertain whether it was originally intended to have in this class the very much more miscellaneous material, some of it post-medieval, that Stevenson went on to include; nonetheless, where he could do so, he attempted with each fresh batch of material to maintain an alphabetical order of places.

Stevenson left the arrangement of the documents catalogued in the *Magnum Repertorium* untouched. Despite the fact that catalogues survived, or could be reconstructed from endorsements on the documents, he re-arranged every other medieval collection of deeds, assigning the documents to Miscellaneous Charters. Subsequently, with the aid of the extant catalogues, Canon Greenwell restored what he believed to be the arrangement of the deeds of the Almoner (*Elemos.*), Finchale priory (*Finc.*), and the Sacrist (*Sacr.*), transferring the documents out of Miscellaneous Charters. He did not attempt the same with the Scottish material, although the catalogue in Misc.Ch. 1026 might have made this possible, and he left in Miscellaneous Charters the collections which are attested by endorsements on the documents, notably the Communar's deeds, also the deeds of the Trinity chantry and of the chantries of Bishops Skirlawe and Langley. Documents remain in Miscellaneous Charters whose endorsed medieval markings reveal that they formerly belonged in the system of locelli, or in receptacles described as *cista* and *cophinus*. Also within Miscellaneous Charters are to be found a substantial number of post-dissolution documents, most of them from the period 1540-1600. One notable medieval collection found in Miscellaneous Charters is a private fifteenth-century deposit of Claxton family deeds; these are only readily identified by the fact that they concern property and other matters with which the chapter had no connection. The same applies to a single document relating to property in Ireland, Misc.Ch. 5243, presumably deposited by its beneficiary, who never returned to collect it; there may be other, less conspicuous, examples.

## Accession details

Placed in the University's care by the Dean and Chapter of Durham in 1948.

To make the catalogue of Miscellaneous Charters less bulky it was split into parts in April 2018. As the Charters do not have a single logical sequence, so the split is purely by number and does not convey any significance by the grouping:

### Form of citation

The form of citation should be GB-0033-DCD-Misc.Ch., or the collection title Durham Cathedral Archive: Miscellaneous Charters, and the *reference number*.

To order items in the searchroom, use the collection reference code(s), derived by removing the repository code (GB-0033-), followed by the reference number. Citing the section of the finding aid is useful.

DCD Misc.Ch. 2475 [3rd quarter 14th century]

Book list, with four columns of books listed on a folded bifolium, which might have had other leaves originally to form a booklet. This list seems to confirm the existence of separate Spendement (which this seems to describe) and cloister book collections, confirmed in the [later] 1392 and 1395 inventories recording some 500 and 380 volumes in each location respectively. The list has (recto) philosophy books in the first two columns, then psalters in column 3 (probably the front of this bifolium originally), then prophets, with, on the verso, gospels, theology, virtues and vices. The surviving text is fragmentary but might include:
